

Holistic and patient-centric approach to healthcare

Precious Medical Centre offers a one-stop solution for a range of medical services from general practice and health screening, to specialist services and dentistry. The centre adopts a holistic approach to healthcare, and focus on the patient, primary prevention and total wellness rather than merely the disease entity.

Located on level 12 of Paragon Medical at Orchard Road, the centre has a diagnostic imaging centre, with equipment which utilise non-radiation modalities such as ultrasound and Magnetic Resonance Imaging (MRI), as well as Mammography and Computed Tomography (CT), which uses the lowest effective dosage of ionising radiation.

Precious Medical Centre also houses a day surgery centre with 3 general anaesthetic operating theatres and an endoscopic suite (allows visualisation of our digestive system using a flexible camera-attached instrument). The centre also has equipment to perform a range of procedures

A Magnetic Resonance Imaging machine in Precious Diagnostic Imaging Centre

ranging from orthopaedic surgery and gynaecology to plastic surgery and dentistry.

Precious Medical was founded by Dr William Chong, a dentist by profession, who graduated from the National University of Singapore in 1985. Dr Chong obtained a Master of Science in Dentistry also from NUS in 1998 and is a Fellow of the Royal Australasian College of Dental Surgeons. In addition to his clinical practice which focuses on implant and cosmetic dentistry, he is also active in the eldercare market segment and also founded Pacific Healthcare Nursing Homes, Pacific Activity Centres.

Pacific Healthcare Nursing Homes at Lengkok Bahru and

Dr William Chong: BDS (Singapore), MScD (Singapore), FRACDS (Australia)

Senja Road have a total of 500 beds and provides in-patient care for residents with varying degrees of physical and mental decline while Pacific Activity Centre was started in support of efforts to encourage active aging for seniors within the community. Altogether more than 400 residents participate actively daily at the 11 centres throughout Singapore.
